**DETAILED ACTION**

1. Claims 1-9 are currently pending in the instant application.

***Previous Claim Rejections - 35 USC § 112***

2. Claims 2, 5 and 7 previously rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. Claims 2 and 4 rejected for reciting the limitation "wherein an iodinating agent is..." when referring back to claim 1.

b. Claims 7 and 8 rejected for reciting the limitation "wherein the reducing agent is..." when referring back to claim 1.

3. Applicants have amended claim 1 in order to insert the above-mentioned limitations into the claim language. Accordingly, the indefiniteness rejections have been overcome and are withdrawn.

***Allowable Subject Matter***

4. As indicated in the previous Office Action, claims 1, 5 and 6 were directed to an allowable process. Applicants' amendments to claim 1 have overcome the pending rejections, therefore all claims are now in condition for allowance.

***REASONS for ALLOWANCE***

5. In view of Applicant's amendatory changes, claims 1-9 are allowable over the prior art. The following is an examiner's statement of reasons for allowance:

This invention relates to novel process for preparing a 4-nitroimidazole compound according to formula (1) of claim 1. Certain methods of producing nitroimidazoles are known in

Art Unit: 1626

the art, however the aspect of preparing the instant claimed 4-nitroimidazole compound of formula (1) in high yeild, by iodinating a 2,5-dihalo-4-nitroimidazole compound of formula (2) and then reducing the resulting 5-iodo-4-nitroimidazole compound of formula (3), is novel and unobvious. After a thorough search, the closest of prior art, the Suwinski et al journal article, was found to teach similar reaction schemes for producing 4-nitroimidazoles. However the journal article fails to teach or render obvious the same process according claim 1, wherein a 2,5-dihalo-4-nitroimidazole is iodinated and then reduced, producing a 4-nitroimidazole in high yeild.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
